Intelligent Transport Systems

ERTICO-ITS Europe

Unique Public Private Partnership

- Powered by the European Commission in 1991
- Bringing together 120 Partners from 8 sectors
- Making mobility smarter, cleaner, safer and more efficient
- Moving of people, goods and data

www.ertico.com

National, European & international focus Coordination with government authorities

ERTICO – ITS EUROPE AND EUROPEAN SPACE AGENCY SIGN MEMORANDUM OF INTENT

ERTICO – ITS Europe and the European Space Agency (ESA) signed a Memorandum of Intent (MoI) at the ESA-ESTEC offices in the Netherlands to further safer and smarter mobility.

Through this partnership, ERTICO and ESA will pave the way for developing and commercialising cutting-edge and more sustainable technologies to support the transition in the transport and mobility sector through the twinning of digital and green.

ERTICO & EU : Focus Areas

ERTICO Focus Areas

Smart Mobility
featured as a main
pillar of a **Smart
Society**

ERTICO Roadmaps in synch with EU policy focus areas

- Smart and Sustainable Mobility strategy
- Urban Mobility strategy
- Green deal
- Digital and data economy, AI and cybersecurity
- Competitiveness and industrial strategy

EU's Smart and Sustainable Mobility Strategy targets towards 2030 & 2050

- **Decarbonisation:** at least 55% emissions reduction by 2030 & 90% reduction of transport emissions by 2050
- **Safety:** Vision Zero and the Safe System approach: reducing road fatalities caused by human error with 50% reduction by 2030 (compared to 2020) & with 0 fatalities by 2050
- **Efficiency:** Focus on less-energy consuming cars, better infrastructure for alternative fuels, better links between modes of transport and better safety and fewer delays thanks to the roll-out of digital technologies

Smart Mobility

CCAM stands for Cooperative Connected and Automated Mobility.

Someone could see it as an umbrella term for intelligent mobility, also called smart mobility

Connected and Automated Mobility provides a unique opportunity to make our transport systems safer, cleaner, more efficient and more user-friendly.

ERTICO **Focus** on CCAM

Clean and eco-mobility

Urban Mobility & MaaS

Transport and Logistics

ERTICO roadmap on CCAM

WE-TRANSFORM

ARCADE

FUTURE-RADAR

Support R&I coordination with tools
for sharing of Knowledge & lessons
learned

2020

Increased awareness about CCAM,
societal impacts and methodologies
for co-creation processes

2023

Better understanding
of wider impacts of AD
including
sustainability for
passenger and
logistics

2027

Infrastructure and connectivity
needs for HLA & Common
definitions for infrastructure
adaptations & digital twins

2030

2035

Integrated, accepted, inclusive and
infrastructure supported operational CCAM
services supporting decarbonisation

2025

CCAM progressed through Mobility Data Space,
edge computing, Big Data & AI for high quality
data collection & sharing

Harmonised regulatory
frameworks in EU, facilitated
testing and liability
frameworks

PROJECTS

PLATFORMS

City Moonshot

SHOW

validation framework

HEADSTART

ENSEMBLE

Connected, Cooperative & Automated Mobility

CCAM (the) sum is greater than its parts !!

- Key enabling technologies, such as **Artificial Intelligence, Big Data and cybersecurity** , are needed to successfully realize CCAM solutions
- Connectivity
- Next generation sensors
- Automation

LEVELS OF DRIVING AUTOMATION

Feet-on/Hands-on/Eyes-on/Brain-on SAE Level 0

Feet-OFF/Hands-on/Eyes-on/Brain-on SAE level 1 and 2

Feet-OFF/Hands-Off/Eyes-on/Brain-on SAE Level 2+

Feet-OFF/Hands-off/Eyes-OFF/Brain-on SAE Level 3

Feet-OFF/Hands-Off/Eyes-OFF/Brain-OFF SAE Level 4 and 5

New safety features in your car

Advanced Drivers Assistance Systems (ADAS)

Regulation (EU) 2019/2144 (2019) on type-approval requirements for motor vehicles and their trailers, and systems, components and separate technical units intended for such vehicles, as regards their general safety and the protection of vehicle occupants and vulnerable road users

ABS	Anti-lock Braking System
AEBS	Advanced Emergency Braking System
DAS	Driver Alert System
ISA	Intelligent Speed Adaptation
LDWS	Lane Departure Warning System
LKA	Lane Keeping Assistance
Park Assist.	

As of 2022, the European Regulation 2019/2144 enters into play. New vehicles must be equipped with a number of advanced vehicle systems (e.g. ISA, incident data recorder, fatigue alert, etc.).

How ADAS works

Example of CCAM deployment the 5G-MOBIX project

EU funded Innovation action (H2020-ICT-18-2018)
(Nov 2018 – Sep 2022)

Objective

Demonstrate scalable and sustainable solutions to address cross-border challenges for CCAM deployment in Europe

CBC use case

Intelligent use of satellite communication and terrestrial 5G for connectivity gaps, improved resilience, critical data

- Integration of satcom into 5G architecture for MEC interconnect

Selected CCAM related activities/use cases

Birds eye view perspectives could enable cars of the future to identify a motorcyclist approaching rapidly from behind and the system could warn the driver or even prevent the vehicle from changing lanes as planned

Source: Continental

Selected CCAM related activities/use cases

Continental -Vodafone develop a digital shield

Source: Continental

Selected CCAM related activities/use cases

Deutsche Telekom working with Continental AG develops technology for [collision warning and protecting vulnerable road users](#) such as pedestrians, users of e-scooters, and cyclists, who are particularly impacted by accidents.

Selected CCAM related activities/use cases

The Autopilot Project

Automated Valet Parking Implementation

Option 1: without IoT

- Parking spot exploration is needed

MAV: Micro Aerial Vehicle

Option 2: With IoT

- No need of parking spot exploration

AUTOPILOT Deployment

9

10/10/2019

Example of CCAM deployment the SHOW project

SHOW aims to support the deployment of shared, connected and electrified automation in urban transport, to advance sustainable urban mobility.

Becoming the bigger ever showcase and living lab for AV fleets by transporting over 1500000 people and 350000 containers of goods through a combined AV fleet of over 70 L4/L5 vehicles (bus, shuttle, pod, car) in 20 cities across Europe.

Benefits

- Reduction of 20% energy consumption and 10% emissions
- Reduction of overall number of private vehicles through intelligent combination of smart Public Transport solutions
- Improving traffic flows
- Establish new business models and improve virtual validation

BENEFITS OF SELF-DRIVING IN THE EU

Sources: EPRS, European Commission

The European Union wishes to become a world leader in the deployment of safe systems for automated mobility,

- increasing road safety and efficiency,
- combating congestion,
- reducing energy consumption and emissions from transport,

(and gradually phasing out fossil fuels)
